¹ Coordinates obtained from the centroid of the three grab samples for each station; UTM Zone 16 (NAD 83).

² This station was designated as *alternate* in the FSP, but was re-assigned a *primary* designation in the field.

³ This station was added in the field (i.e., was not listed in the FSP).

DW = dry weight; max = maximum; min = minimum; n = number of samples; NA = not applicable; PCBs = polychlorinated biphenyls.

¹ The standard deviation and percentiles were not calculated when fewer than three samples were available in a reach. In these instances "NA" was written instead.

DW = dry weight; max = maximum; min = minimum; n = number of samples; NA = not applicable; PCBs = polychlorinated biphenyls.

¹The standard deviation and percentiles were not calculated when fewer than three samples were available in a reach. In these instances "NA" was written instead.

DW = dry weight; max = maximum; min = minimum; n = number of samples; NA = not applicable; PCBs = polychlorinated biphenyls.

¹ The standard deviation and percentiles were not calculated when fewer than three samples were available in a reach. In these instances "NA" was written instead.

DW = dry weight; max = maximum; min = minimum; n = number of samples; NA = not applicable; PCBs = polychlorinated biphenyls.

¹ The standard deviation and percentiles were not calculated when fewer than three samples were available in a reach. In these instances "NA" was written instead.

DW = dry weight; max = maximum; min = minimum; n = number of samples; NA = not applicable; PCBs = polychlorinated biphenyls.

¹ The standard deviation and percentiles were not calculated when fewer than three samples were available in a reach. In these instances "NA" was written instead.

DW = dry weight; max = maximum; min = minimum; n = number of samples; NA = not applicable; PCBs = polychlorinated biphenyls.

¹ The standard deviation and percentiles were not calculated when fewer than three samples were available in a reach. In these instances "NA" was written instead.

DW = dry weight; max = maximum; min = minimum; n = number of samples; NA = not applicable; PCBs = polychlorinated biphenyls.

¹ The standard deviation and percentiles were not calculated when fewer than three samples were available in a reach. In these instances "NA" was written instead.

DW = dry weight; max = maximum; min = minimum; n = number of samples; NA = not applicable; PCBs = polychlorinated biphenyls.

¹ The standard deviation and percentiles were not calculated when fewer than three samples were available in a reach. In these instances "NA" was written instead.

DW = dry weight; max = maximum; min = minimum; n = number of samples; NA = not applicable; PCBs = polychlorinated biphenyls.

¹ The standard deviation and percentiles were not calculated when fewer than three samples were available in a reach. In these instances "NA" was written instead.

DW = dry weight; max = maximum; min = minimum; n = number of samples; NA = not applicable; PCBs = polychlorinated biphenyls.

¹ The standard deviation and percentiles were not calculated when fewer than three samples were available in a reach. In these instances "NA" was written instead.

DW = dry weight; max = maximum; min = minimum; n = number of samples; NA = not applicable; PCBs = polychlorinated biphenyls.

¹ The standard deviation and percentiles were not calculated when fewer than three samples were available in a reach. In these instances "NA" was written instead.

DW = dry weight; max = maximum; min = minimum; n = number of samples; NA = not applicable; PCBs = polychlorinated biphenyls.

¹ The standard deviation and percentiles were not calculated when fewer than three samples were available in a reach. In these instances "NA" was written instead.

DW = dry weight; max = maximum; min = minimum; n = number of samples; NA = not applicable; PCBs = polychlorinated biphenyls.

¹ The standard deviation and percentiles were not calculated when fewer than three samples were available in a reach. In these instances "NA" was written instead.

DW = dry weight; max = maximum; min = minimum; n = number of samples; NA = not applicable; PCBs = polychlorinated biphenyls.

¹ The standard deviation and percentiles were not calculated when fewer than three samples were available in a reach. In these instances "NA" was written instead.
