

Conservation and Outdoor Literature

While the foundations of natural resource management are in science, the inspiration for this work is often reflected in the words of some of our nation's greatest writers and scientists. Literature can take us to places we've never been; it can help us understand the life of an animal or the movement of a river; it can examine the conservation challenges we face; and perhaps most importantly, it can deepen our appreciation for the world around us and inspire us to take care of it.
