RE: Withdrawal of Petition for Hatchie burrowing crayfish (*Fallicambarus hortonii*), egg-mimic darter (*Etheostoma pseudovulatum*), and saddled madtom (*Noturus fasciatus*)

Dear Secretary Jewell and others:

On April 20, 2010, the Center for Biological Diversity and allies petitioned for Endangered Species Act protection for 404 aquatic, riparian, and wetland species from the southeastern United States including the Hatchie burrowing crayfish (*Fallicambarus hortonii*), egg-mimic darter (*Etheostoma pseudovulatum*), and saddled madtom (*Noturus fasciatus*). On September 27, 2011, the Service issued a positive 90-day finding for 374 of the species in the petition including these three species from Tennessee (76 FR 59836).

In light of new information indicating that these three species are not as imperiled as they were previously considered to be, I am writing to withdraw the Hatchie burrowing crayfish (*Fallicambarus hortonii*), egg-mimic darter (*Etheostoma pseudovulatum*), and saddled madtom (*Noturus fasciatus*) from the petition.

Please feel free to contact me with any questions.

On behalf of all petitioners,

Tierra Curry
