Santee National Wildlife Refuge is one of 562 National Wildlife Refuges in the U.S. and its territories. The mission of this system is to administer a national network of lands and waters for the conservation, management, and where appropriate restoration of the fish, wildlife, and plant resources and their habitats within the U.S. for the benefit of present and future generations of Americans. Hunting is one of many necessary tools used to responsibly balance wild animal populations by removing surplus animals and ensure the overall health of all wildlife.

The provisions listed below supplement the general regulations which govern hunting, fishing and public use on wildlife Refuge areas set forth in Title 50, Code of Federal Regulations. When permitted, hunting, fishing and other public uses will be in accordance with applicable state laws unless otherwise listed. Only the hunting seasons designated in this brochure are permitted on Santee National Wildlife Refuge.
